

BAND HEATERS

MICA INSULATION BANDS

- Mica insulation offers thin construction (4mm)
- Watts density of 3.5 W/cm²
- Operating temperature up to 250°C
- For elements rated in excess of 4000W ceramic insulation is recommended

SERRATED / FLEXIBLE BAND HEATERS - available on request. These are used on larger barrels where fitment of the heater is problematic due to lack of flexibility.

Heating and Control Solutions that exceed Industry expectations
